Course Aims and Learning Outcomes

This course is designed to give students the opportunity to:

- Gain a wide-ranging and in-depth understanding of the role and usage of international sporting stadia in the modern day
- Evaluate and analyse the strategic application of event planning, logistics, marketing, human resource and financial management within the international stadium and event industry
- Develop comprehensive subject knowledge and understanding through the use of lectures, seminars, added value industry experiences and academic research
- Undertake and benefit from varied applied experiential learning in organising, marketing and delivering live events during the duration of the course

What students will learn:

Knowledge (Subject Based)

- explain, interpret and challenge theories and concepts which are used to understand the origin, purpose, meanings and development of events from a range of critical perspectives
- display an insight into the structure of event providers and their sectors, and analyse the political, technological, social, environmental and economic factors which affect, or impact upon, the supply of, and demand for, events
- demonstrate a critical awareness and understanding of how core values, for example, ethics, sustainability, creativity, strategy, and continuous improvement, relate to, and are reflected in, events.

Thinking skills

- demonstrate a critical awareness and understanding of appropriate domains, including administration, design, operations, marketing and risk, and how they apply to the phases of events, such as initiation, planning, staging of the event and closure and legacy
- display critical knowledge, understanding and application of risk management and the legal, ethical and regulatory frameworks that affect event management, including health and safety considerations and crowd management

Subject-Based Practical skills

- plan, project manage, produce, stage, analyse and evaluate events, including the procurement of support service provision, the application of new technologies and logistics
- operate and effectively manage resources, including human (paid or volunteer), financial, venue, and subcontracted and technical resources and the development of return on investment models
- design creative events, including the programming of spectacle, exhibition, ritual, and performance

Skills for life and work (general skills)

- analyse the nature, characteristics, needs and expectations of different consumers through applying consumer behaviour theories and concepts and socio-cultural theories
- evaluate the legacy and impacts of events in social, economic, environmental, political, cultural, technological and other terms
- appreciate the ethical and sustainability issues associated with the financial support, operation and development of events
